

## **Fabricator / Assembler**

**Enexor BioEnergy LLC**

Franklin, TN

### **About the Company**

Enexor BioEnergy is a privately funded manufacturing company located in Franklin, TN. Enexor manufactures a unique new technology that converts organic waste into clean energy for commercial, industrial and institutional customers. We have also recently launched a Health Systems division that manufactures critical medical equipment for hospitals around the world. We believe in people over process and taking risks to achieve remarkable outcomes. We are seeking fabricators and assemblers who are passionate about building great products and want to be a part of an exceptional team.

This position is based in Franklin, TN. Relocation assistance will not be provided.

### **Role and Responsibilities**

We are looking for driven, full-time assemblers and fabricators to join our growing team. We are currently operating a single shift, day only medical device production line to meet domestic and international demand and batch manufacturing process for our renewable energy product.

### **Key Responsibilities**

- Fabricate and/or assemble parts and machinery with attention to detail.
- Assess quality of parts and assemblies, troubleshoot, and properly record for records.
- Assist with production floor and equipment cleanliness and maintenance as if it were your own.
- Support a life-long learning environment, enhancing own skills and assisting development of others.
- Perform other related duties as required.
- Safety is a core value. Each person mitigates risks actively and maintains team standards.

### **Qualifications and Educational Requirements**

- No minimum experience. Local to middle Tennessee candidates preferred.
- Candidates must be authorized to lawfully work in the United States.
- Candidate must be authorized to lawfully work in the United States without employee sponsorship.

### **Preferred Skills**

- Assembly skills (operating powered hand tools, wiring, plumbing tubes, fastening, cleaning).
- Specialty skills (welding, electrical, metal forming), a plus.
- Familiarity with General Industry OSHA safety requirements, a plus.
- Making creative, hands-on solutions to continuously improve Key Performance Indicators, a plus.
- Able to lift up to 50 lbs safely (a plus) and remain active for an 8-hour shift.
- Must be able to work effectively and safely with minimal supervision.

### **Compensation and Benefits**

- Competitive Hourly Rate based on experience with opportunities to advance.
- Paid Vacation & Holidays, Health Insurance Stipend and 401K following probationary period.
